

PROVIDING GLOBAL ACCESS TO QUALITY MEDICAL CARE

M E D I C A L K I T S

Imres has the ideal medical kit solution for every international relief programme

A COMPLETE MEDICAL SOLUTION IN A BOX

That is the essence of a medical kit. In this brochure, you will find an overview of our range of medical kits. If you need a solution for which there is no kit available yet, we can customise one for you.

Imres packs and distributes all types of emergency and medical kits, according to our customers' specific requirements. These range from simple to complicated kits, for a variety of purposes, assembled either from stock or specially developed and sourced for customers.

FAST & EFFICIENT

The best medicine is useless if it cannot get to where it is needed, when it is needed. We know that delays can cost lives, so our logistics solutions are designed for speed and efficiency. We hold sufficient stock of the most common medical kits. Our experienced logistics department can get stocked kits to any location in the world within 48 hours of receiving your order.

EXPERT SOURCING & FLEXIBILITY

Do you need a kit solution that is not readily available? Over the years Imres has composed many custom-made medical kits for various needs, in close collaboration with our customers. Our extensive database of quality suppliers and product combinations enables us to cater for every medical supply need that you may have. While more than 40 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

QUALITY

You want to be sure that the products for your health programme are high quality. We do not take any chances when it comes to the quality of the kits and products that we supply.

Imres has implemented an uncompromising set of quality controls, including a dedicated quality control department and independent testing in World Health Organization (WHO) pre-qualified and ISO/IEC 17025:2005 certified laboratories for pharmaceutical products. Our stringent vendor rating system sees Imres visiting and screening vendors around the world. Manufacturers must achieve our high, internationally recognised standards, and those of our customers, and that they adhere to the necessary quality control processes to qualify as an Imres vendor. All our products are screened, to ensure the quality of every item that we supply.

FACTS ABOUT THE IMRES MEDICAL KITS

Over 1 million kits produced

10,000 kits in stock

Sourced from 200 + quality manufacturers

24/7 emergency response

PROVEN SOLUTION

An Interagency Emergency Health Kit (IEHK) contains all the necessary medication and basic medical supplies for a population of 10,000 for three months. In a refugee camp with a population of 50,000, five IEHK kits provide the basic medical solution for the entire population; all conveniently packed in clearly marked boxes.

MODULES OF THE 2017 INTERAGENCY EMERGENCY HEALTH KIT

67332	IEHK 2017, Supplementary : Module, Renewable	en/es/fr/pt
67333	IEHK 2017, Supplementary : Module, Equipment	en/es/fr/pt

IEHK COMPOSITION

The IEHK 2017 consists of two different sets of medicines and medical devices: a Basic Unit and a Supplementary Unit. Each IEHK is designed to serve 10,000 people for three months.

All units are packed in extra sturdy boxes to ensure its contents are secure. Each box has a maximum weight of 25 kg and is equipped with convenient carrying handles on the sides.

We hold sufficient stock of IEHK's to respond quickly to any crisis or emergency situation.

1,000	1,000	1,000	1,000	1,000	} 10 x 1 Basic Unit for 10 x 1,000 people	} Total: 1 emergency health kit for 10,000 people for 3 months
1,000	1,000	1,000	1,000	1,000		
10,000					} 1 Supplementary Unit for 1 x 10,000 people	

BASIC UNIT MODULES

The Basic Unit contains essential medicines and medical devices, and can be used by primary healthcare workers with limited training. It contains oral and topical medicines, and no injectables. To facilitate distribution to smaller health facilities on site, the quantities of pharmaceuticals and medical devices in the basic unit have been divided into 10 identical units, each for 1,000 people.

SUPPLEMENTARY UNIT MODULES

The Supplementary Unit contains additional essential medicines and medical devices, and is to be used only by professional health workers or physicians. There are eight modules in the supplementary unit. One with equipment, one with renewables, one with documentation and five with medicines. Some of the modules are optional since they may not be needed in all cases.

OPTIONAL MODULES

Anti-malaria modules are available for both the Basic Unit and the Supplementary Unit. The anti-malaria module for the Basic Unit consists of a combination therapy for the treatment of uncomplicated falciparum malaria, as well as malaria rapid tests. The anti-malaria module for the Supplementary Unit consists of second line treatment injectable drugs.

The Supplementary Unit also has an optional post-exposure prophylaxis (PEP) module. It contains medicines and diagnostics for first line treatment after potential exposure to HIV infection.

The other optional modules are the cold chain medicines, the controlled medicines and the documentation module. The optional modules will only be included on specific request.

Emergency Reproductive Health (ERH) Kits have been designed primarily to provide priority reproductive health services to displaced populations without medical facilities, or where medical facilities are disrupted during a crisis. These kits contain essential drugs, supplies and equipment to be used for a limited period and a specific number of people.

ERH KIT COMPOSITION

The Reproductive Health Kits are categorised in three blocks. Each block targets a different health service delivery level. All units are packed in extra sturdy boxes to ensure its contents are secure and each box is equipped with convenient carrying handles on the sides.

BLOCK 1

Contains six kits. The items in these kits are intended for use by service providers delivering reproductive health care at community and primary health care level. Each kit is designed to provide for the needs of 10 000 people for 3 months. The kits contain mainly medicines and disposable items. Kits 1 and 2 are divided into parts A and B, which can be ordered separately.

Art. Nr	Kit No.	Description	Language label	Color code
29596	Kit 0	Administration/training supplies	en/es/fr/pt	Orange
29456	Kit 1A	Condoms male	en/es/fr/pt	Red
32640	Kit 1B	Condoms female	en/es/fr/pt	Red
33078	Kit 2A	Clean delivery, individual	en/es/fr/pt	Dark blue
33077	Kit 2B	Clean delivery, for use by birth attendants	en/es/fr/pt	Dark blue
29458	Kit 3	Post rape treatment	en/es/fr/pt	Pink
30165	Kit 4	Oral and injectable contraception	en/es/fr/pt	White
29459	Kit 5	Treatment of sexually transmitted infections	en/es/fr/pt	Turquoise

BLOCK 2

Contains five kits with disposable and reusable supplies, for use by trained healthcare providers with additional midwifery and selected obstetric and neonatal skills at the health centre or hospital level. These kits are designed to be used for a population of 30 000 people over a 3-month period. It is possible to order these kits for a population of less than 30 000 persons; this means that the supplies will last longer. Kit 6 has two parts, A and B, which are used together but can be ordered separately.

Art. Nr	Kit No.	Description	Language label	Color code
46126	Kit 6A	Clinical delivery assistance, reusable equipment	en/es/fr/pt	Brown
46127	Kit 6B	Clinical delivery assistance, drugs & disposable equipment	en/es/fr/pt	Brown
30046	Kit 7	Intrauterine devices (IUDs)	en/es/fr/pt	Black
29597	Kit 8	Management of miscarriage and complications of abortion	en/es/fr/pt	Yellow
29461	Kit 9	Suture of tears (cervical and vaginal) and vaginal examination	en/es/fr/pt	Purple
29462	Kit 10	Vacuum extraction delivery	en/es/fr/pt	Grey

BLOCK 3

Contains two kits with disposable and reusable supplies to provide comprehensive emergency obstetric and newborn care at the referral (surgical obstetrics) level. It is estimated that a hospital at this level covers a population of approximately 150 000 persons. The supplies provided in these kits would serve this population for 3 months. Kit 11 has two parts, A and B, which are usually used together but which also can be ordered separately.

68507	(TESK 2019 module 1A) SET, DRUGS, DANGEROUS GOODS	en/es/fr/pt
68508	(TESK 2019 module 1A) SET, DRUGS, INFUSIONS	en/es/fr/pt
68509	(TESK 2019 module 1A) SET, DRUGS, DISINFECTANTS	en/es/fr/pt

SUB-MODULE 1B, CONTAINS ELEVEN SETS

Art. Nr	Description	Language label
66554	(TESK 2019 module 1B) SET, RENEWABLES, GLOVES	en/es/fr/pt
68510	(TESK 2019 module 1B) SET, RENEWABLES, ANAESTHESIA, BASIC MATERIAL	en/es/fr/pt
68511	(TESK 2019 module 1B) SET, RENEWABLES, INJECTION MATERIAL	en/es/fr/pt
68512	(TESK 2019 module 1B) SET, RENEWABLES, DRESSING MATERIAL	en/es/fr/pt
68514	(TESK 2019 module 1B) SET, RENEWABLES, DRESSING MATERIAL, BURNS	en/es/fr/pt
68513	(TESK 2019 module 1B) SET, RENEWABLES, PLASTER CASTING MATERIAL	en/es/fr/pt
68515	(TESK 2019 module 1B) SET, RENEWABLES, STERILISATION, FOR AUTOCLAVE	en/es/fr/pt
68516	(TESK 2019 module 1B) SET, RENEWABLES, SURGICAL DRAINAGE MATERIAL	en/es/fr/pt
68517	(TESK 2019 module 1B) SET, RENEWABLES, SUTURES	en/es/fr/pt
68518	(TESK 2019 module 1B) SET, RENEWABLES, URINE DRAINAGE MATERIAL	en/es/fr/pt
68519	(TESK 2019 module 1B) SET, RENEWABLES, SURGICAL MISCELLANEOUS MATERIAL	en/es/fr/pt

SUB-MODULE 1C, CONTAINS FOUR SETS

Art. Nr	Description	Language label
68520	(TESK 2019 module 1C) SET, SUPPLEMENTARY, ANAESTHESIA MATERIAL	en/es/fr/pt
68521	(TESK 2019 module 1C) SET, SUPPLEMENTARY, EXTRICATION COLLARS	en/es/fr/pt
68522	(TESK 2019 module 1C) SET, SUPPLEMENTARY, SPLINTS, FOR 15-20 FRACTURE CASES	en/es/fr/pt
69953	(TESK 2019 MODULE 1C) SUPPLEMENTARY, INTUBATION & LARYNGOSCOPE	en/es/fr/pt

NON-COMMUNICABLE DISEASE KIT (NCDK)

Non-communicable diseases are increasingly becoming a primary cause of death worldwide. The healthcare systems in emergency situations or low resource settings are usually not geared to treat these diseases. The WHO has developed a standardised kit that fills the gap between the Interagency Emergency Health Kit and the treatment of NCDs in primary healthcare, the Non-Communicable Disease Kit.

The Non-Communicable Disease Kit is a pre-packed, standardised medical kit for managing the most common non-communicable diseases like diabetes, cardiovascular diseases, chronic lung diseases, hypertension, cancer and selected mental health conditions. The NCDK contains oral medicines, renewables, medical devices and additional products. It serves 10.000 people for three months. The NCDK can be used in both emergency situations as well as in other low resource settings. Due to its modular set-up, it can be ordered as a complete kit, or the sub modules can be ordered independently.

BASIC NON-COMMUNICABLE DISEASE KIT MODULES

HYGIENE KIT

The Hygiene Kit plays an essential role in ensuring the well-being of people in distress. Being able to maintain their basic hygiene and cleanliness is not only important for the psychological well-being of people in distress, it also helps to prevent the spread of infectious diseases.

The Imres personal hygiene kit meets the basic needs of adults and children, providing quality, care and comfort to those who receive it.

This kit comes in a convenient package and supports the hygiene requirements of a family of five. Because we keep hygiene kits in stock, Imres can respond immediately to the need for them, anywhere in the world.

CHOLERA KITS

Cholera kits are designed to help prepare for a potential outbreak and to support the first month of the initial response. Imres's cholera kits are tailor-made and designed according to WHO specifications, to prepare for outbreaks and to meet the needs for the initial response.

SURGICAL INSTRUMENT KITS

The Surgical Instruments Kits offered by Imres are complete solutions for specific surgical procedures. They are carefully composed in close collaboration with our customers, and consist of the highest quality instruments. Please contact us if you need a surgical kit solution that is not on this list as we can compose a custom kit solution for your specific need.

THE IMRES DIFFERENCE

+ Over more than **40 years**, Imres has proved that we are a **reliable, efficient and trusted partner** in **healthcare strengthening programmes** in developing countries.

+ As an organisation, we are big enough to **make a difference**, but small enough to give our customers personal attention, and to care about the difference that we are making in lives and communities, and in our partners' health projects.

+ We have **offices and facilities** in the **Netherlands, Dubai, India and China**.

+ Our **production areas** include a GMP room for secondary packing and a **Class D clean room** for primary packaging, as well as a **1000 m² kit production area**. As a supplier, we do not make promises that we cannot keep. If we commit to a project and specific deliverables, it is because we really can deliver, as promised.

+ Like the projects that we are **proud** to be part of, Imres has heart. We are good at what we do, but we also feel good about what we do. We feel responsible for our partners' projects until each one ends **successfully**.

+ Then we move onto our **next challenge**; our next opportunity to turn humanitarian dreams into **concrete solutions** and **decisive action** that saves lives.
