Economical to buy – profitable to use

Advanter

# The products are the stars here. Clearly arranged and at a convenient height for the consumer.

## Concentration on the most important aspects

The practice-orientated system design is not only a factor that is economically advantageous. The Advanter also offers a lot of space for a presentation, allowing products to be shown from their most attractive side. The large display area for goods allows the consumer to view all of the merchandise on offer ideally.

As a result, the range of applications stretches from self-service meat, convenience foods, dairy products and drinks to fruit, vegetables and herbs.

## Cross-selling schemes

- Pasta and herbs
- 'Smoothies' and prepared salads
- Salads and dips
- Fruit salads and sandwiches

Optional cladding panels on the back

# Economical, ready to plug in and smartly presented. Do you still have any questions?

The Advanter is our answer to your questions. These cost-effective versions of the refrigerated display cabinets are primarily impressive in do not terms of economic criteria. The fact that you do not have to sacrifice either functionality or profitable features is very persuasive in this case too.

The well thought-out design and construction enable the consumer to step up to the assortment of goods as closely as desired and they also make it much easier to fill the shelves. You can achieve any desired appearance by choosing from a wide selection of colours to suit your selling area.

The practice-orientated system design avoids mismatching and thus guarantees an extremely high degree of hygiene when the display cabinet is handed over to the shop-fitter for installation

R 404 A refrigerant and pentane foaming agent in the insulation have no harmful effects on the ozone layer

## The outer and inner values:

A standard, manually operated night cover

Included in the delivery: 40 mm high scanner price rails on all levels of the display shelves

A large surface for displaying goods with a front opening that is 1.20 m in height

An energy-saving electronic control unit with a digital display optimizes the refrigeration and reduces the operating costs

The filling front is only 570 mm high

The basic version has three display shelves (450 mm deep), including the integrated, 40 mm wide scanner price rails

The side panels are partially glazed with laminated insulating glass as standard, in order to prevent condensation from forming

The energy-saving condensing unit uses waste heat from the refrigerating system to evaporate the condensed water

The components are arranged for convenient servicing and the condensing unit is removable

A practical cleaning channel separates the condensed water from cleaning water

Adjustable feet enable the height to be aligned correctly

# We do not leave any wish unfulfilled. Accessories for the most varied configurations.

## Extend the lingering time during buying

An apparently enlarged space affects the buying ambience agreeably, especially in smaller or closely arranged selling areas. You can create a great effect at low cost with the mirror for the goods area or supplementary lighting for the display shelves, or both.

A 326 mm deep mirror over the goods space

Supplementary lighting for the display shelves

A set of goods baskets and grille dividers for fruit and vegetables

Height-adjustable display shelves with grilles

Goods dividers made from transparent acrylic sheets or coated metal grilles

Goods dividers for the bottom display shelf

Cladding panels on the back in the same colour as the display cabinet

A motor-driven night blind

Buffer rails for the front panel and side panels (colours on request)

## You can always rearrange your goods on offer

This is typically done with goods baskets for assortments of fruit and vegetables; or perhaps by combining the display shelves and goods baskets for cross-selling ideas? Decide for yourself.

## Optional accessories (not illustrated):

- A hooked display shelf for hanging groups of convenience goods
- A bottom rail with a splashproof guard
- Castors for the 10 and 13 lengths of refrigerated display cabinets (on request)
- A version for connecting to an external refrigerating system
- A cover strip is available in the same colour as the cabinets, for masking the gap when they are placed back-to-back
- An extra display shelf for a very deep range of goods
- A soundproofing package for especially quiet operation
- Goods stoppers made from transparent acrylic sheets or coated metal grilles that are 50 mm or 100 mm high
- A set of cleaning bowls for easy, basic cleaning
- A setting-up aid for integrating the display cabinets during shop-fitting

Standard display cabinet

Version with four display shelves

Version for fruit and vegetables

Version for meat products
