### A COMPLETE MEDICAL SOLUTION IN A BOX

That is the essence of a medical kit. In this brochure, you will find an overview of our range of medical kits. If you need a solution for which there is no kit available yet, we can customise one for you.

Imres packs and distributes all types of emergency and medical kits, according to our customers' specific requirements. These range from simple to complicated kits, for a variety of purposes, assembled either from stock or specially developed and sourced for customers.

### FAST & EFFICIENT

The best medicine is useless if it cannot get to where it is needed, when it is needed. We know that delays can cost lives, so our logistics solutions are designed for speed and efficiency. We hold sufficient stock of the most common medical kits. Our experienced logistics department can get stocked kits to any location in the world within 48 hours of receiving your order.

### EXPERT SOURCING & FLEXIBILITY

Do you need a kit solution that is not readily available? Over the years Imres has composed many custom-made medical kits for various needs, in close collaboration with our customers. Our extensive database of quality suppliers and product combinations enables us to cater for every medical supply need that you may have. While more than 35 years of experience has enabled us to identify the best and most reliable suppliers for each of our products, Imres strives to continuously improve, expand and innovate. We constantly source new products and suppliers. This ensures that we keep our range up to date, and that we consistently provide our customers with the best prices, products and quality.

## QUALITY

You want to be sure that the products for your health programme are high quality. We do not take any chances when it comes to the quality of the kits and products that we supply.

Imres has implemented an uncompromising set of quality controls, including a dedicated quality control department and independent testing in World Health Organisation (WHO) pre-qualified and ISO/IEC 17025:2005 certified laboratories for pharmaceutical products. Our stringent vendor rating system sees Imres visiting and screening vendors around the world. Manufacturers must achieve our high, internationally recognised standards, and those of our customers, and that they adhere to the necessary quality control processes to qualify as an Imres vendor. All our products are screened, to ensure the quality of every item that we supply.

## FACTS ABOUT THE IMRES MEDICAL KITS

## PROVEN SOLUTION

An Interagency Emergency Health Kit (IEHK) Kit contains all the necessary medication and basic medical supplies for a population of 10,000 for three months. In a refugee camp with a population of 50,000, five IEHK kits provide the basic medical solution for the entire population; all conveniently packed in clearly marked boxes.

**INTERAGENCY EMERGENCY HEALTH KIT**

Art. Nr	Description
61825	Kit, Interagency Emergency Health, 2015, Basic unit, without anti-malarial module
61826	Kit, Interagency Emergency Health, 2015, Anti-malarial module for Basic unit

61828	Kit, Interagency Emergency Health, 2015, Anti-malarial module for Supplementary Drugs unit
61831	Kit, Interagency Emergency Health, 2015, PEP module for Supplementary Drugs unit

**IEHK COMPOSITION**

The IEHK 2015 consists of two different sets of medicines and medical devices: A Basic Unit and a Supplementary Unit. Each IEHK is designed to serve 10,000 people for three months.

All units are packed in extra sturdy boxes to ensure its contents are secure, and each box is equipped with convenient carrying handles on the sides.

We hold sufficient stock of IEHK Kits to respond quickly to any crisis or emergency situation.

1,000	1,000	1,000	1,000	1,000	} 10 x 1 Basic Unit for 10 x 1,000 people	} Total:  1 emergency health kit for 10,000 people for 3 months
1,000	1,000	1,000	1,000	1,000		
10,000					} 1 Supplementary Unit for 1 x 10,000 people	

**BASIC UNIT**

The Basic Unit contains essential medicines and medical devices, and can be used by primary healthcare workers with limited training. It contains oral and topical medicines, and no injectables. To facilitate distribution to smaller health facilities on site, the quantities of pharmaceuticals and medical devices in the basic unit have been divided into 10 identical units, each for 1,000 people.

**SUPPLEMENTARY UNIT**

The Supplementary Unit contains additional essential medicines and medical devices, and is to be used only by professional health workers or physicians. It contains different pharmaceuticals and supplies to the Basic Unit and therefore the units, which complement each other, should ideally be used together.

The Supplementary Unit consists of three modules: the drugs module, the renewables module and the equipment module.

**OPTIONAL MODULES**

Optional anti-malaria modules are available for both the Basic Unit and the Supplementary Unit. The anti-malaria module for the Basic Unit consists of a combination therapy for the treatment of uncomplicated falciparum malaria, as well as malaria rapid tests.

The anti-malaria module for the Supplementary Unit consists of second line treatment injectable drugs. The Supplementary Unit also has an optional post-exposure prophylaxis (PEP) module. It contains medicines and diagnostics for first line treatment after potential exposure to HIV infection. These anti-malaria and PEP modules will only be included on specific request.

Imres's Emergency Reproductive Health (ERH) Kits have been designed primarily to provide priority reproductive health services to displaced populations without medical facilities, or where medical facilities are disrupted during a crisis. These kits contain essential drugs, supplies and equipment to be used for a limited period and a specific number of people.

Each of the Reproductive Health Kits responds to a particular reproductive health need, and contains supplies calculated for a precise number of people for a three-month period. The kits can be ordered separately as a "stand-alone" response to a particular situation.

Imres holds sufficient stock of ERH Kits to respond quickly to any crisis or emergency.

## THE IMRES DIFFERENCE

**+** Over more than **35 years**, Imres has proved that we are a **reliable, efficient and trusted partner** in **healthcare strengthening programmes** in developing countries.

**+** As an organisation, we are big enough to **make a difference**, but small enough to give our customers personal attention, and to care about the difference that we are making in lives and communities, and in our partners' health projects.

**+** We have **offices** in the **Netherlands, Dubai, India, Canada, China** and the **Democratic Republic of Congo**.

**+** Our **production areas** include a **GMP room** for secondary packing and a **Class D clean room** for primary packaging, as well as a **450 m<sup>2</sup> kit production area**. As a supplier, we do not make promises that we cannot keep. If we commit to a project and specific deliverables, it is because we really can deliver, as promised.

**+** Like the projects that we are **proud** to be part of, Imres has heart. We are good at what we do, but we also feel good about what we do. We feel responsible for our partners' projects until each one ends **successfully**.

**+** Then we move onto our **next challenge**; our next opportunity to turn humanitarian dreams into **concrete solutions** and **decisive action** that saves lives.
